October 1, 2004

The development of IJC Substance Abuse Education Curriculum Submission and Evaluation Procedure was a long, difficult process that has resulted in standards that are very rare. To our knowledge, Indiana is one of only two states (Georgia is the other state) to have published substance abuse education curriculum standards. Such an undertaking is complex due to varied interpretations, definitions and standards..

CADPAC and the Indiana Judicial Center would like to acknowledge those whose dedicated work resulted in the development of this procedure. Their ability to foster a consensus in this area is a tribute to the professionalism of all involved in this project. We wish to thank all members of CADPAC and the CADPAC Education Subcommittee who approved these standards and the staff of Crowe Chizek and Company, LLC, who developed these standards at the direction of the Education Criteria Workgroup and IJC staff. A special thanks is extended to the members of the Education Criteria Workgroup. They were:
